Subject: Re: Request for IM Categorization_DRC Floods

Dear Mariette,

Kindly find the Crisis Categorisation for DRC floods. The CC is Lower ORANGE.

This classification is a result of the already compounding crises in the DRC, resulting in high pre-crisis vulnerability, of the populations facing significant exposure to hazards and limited coping mechanisms. Additionally, access constraints in some areas are further exacerbating the situation.

Let me know if you have any questions.

Country	Crisis Categorization	Crisis Score	Pre-Crisis Vulnerability	Crisis Complexity	Scope & Scale	Humanitarian Conditions	Capacity & Response
DRC- 2025 Floods	ORANGE	1.88	2.29	2.10	1.33	1.88	1.80
Crisis Score = (Pre-Crisis Vulnerability + Crisis Complexity + Scope and Scale + Humanitarian Conditions + Capacity and Response) / 5							
Color coding: If score < 1.7, color code score in yellow; if 1.7 <= score < 2.5, color code score in orange; if score > 2.5, color code score in red							

Best
Elijah

Subject: Request for IM Categorization_DRC Floods

Dear Pauline/Elijah,
Could you please assist with the categorization of floods in DRC?
Attached is the DREF request email with elements that can help. The PM is in copy if you have more questions.
Best regards

Mariette TCHAMDA
