

SOUTH-EAST TURKIYE EARTHQUAKE

BUILDING DAMAGE COMPOSITE OF AVAILBLE SOURCES FOR HIGHLIGHTED CITIES

NOTE: COMBINATION OF MULTIPLE DATA SOURCES IN VARYING STATES OF COMPLETION

Damage degrees are a combination of multiple data sources, and should not be interpreted as a count of total destroyed buildings. Different sources may not reflect the same building damage, or degree. Therefore, damage maps should be interpreted as degree of potential damage in an area or neighborhood. Temporary camp points are derived from post disaster satalight data and may have dispersed.

The maps used do not imply the expression of any opinion on the part of the International Federation of Red Cross and Red Crescent Societies or National Societies concerning the legal status of a territory or of its authorities.
